## About me

I'm a passionate developer with 5+ years of industry experience. I specialize in MERN(MongoDB, Express, React, Node) stack applications. I'm very adept at third-party integrations and learning new skills fast and effectively. I work well both independently and with large teams of developers. I love collaboration and inclusive design. I'm a 2SLGBTQIA+ ally and when I'm not working I like to volunteer at my local pride center.

---

## Experience

### Senior Software Engineer, Awareness Athletics Inc.

2018 – Present | Belleville, Canada

At Awareness Athletics Inc. I was responsible for overseeing their 'Slo-Pitch For Awareness' brand website. I managed everything from UX/UI design and prototyping to the development of the front-end Design and backend integrations. At Awareness Athletics we used technologies like React, Node, MongoDB, Git, and more to accomplish our desired outcome. Clean and easy-to-use event management and eCommerce platform for their customers.

---

## Education

### Harvard University

2022 – Present

Computer Science

Currently, Completing my graduate degree at Harvard University Extension School.

---
